

THE MEADOWS DAY PROGRAM

At Frasier, we believe in connection, engagement, and relationships.

The Meadows Day Program at Frasier provides opportunities for seniors with dementia challenges by offering engaging and stimulating activities throughout the day that encourage a sense of purpose, creativity, personal growth, physical, emotional, and spiritual needs in a social atmosphere. The program maintains a high level of care to meet the needs of the individual person by promoting wellness and independence to empower seniors to remain in their own home, or home of a family member and/or caregiver.
